Workshop on “Medico Legal Test of Women and Child Victims of Sexual Abuse”

Sexual violence takes place within a variety of settings, including the home, the workplace, schools and the community. In many cases, it begins in childhood or adolescence. Sexual violence has a significant negative impact on the health of the victim. The mental health consequences of sexual violence can be just as serious and long lasting. Victims of sexual assault require comprehensive and gender-sensitive health services in order to cope with the physical and mental health consequences of their experience and to aid their recovery from an extremely distressing and traumatic event. In addition to providing immediate health care, victim may later need social welfare and legal aid. Collection, preservation and

documentation of the evidence are necessary for corroborating the circumstances of the assault and for identifying the perpetrator. Such evidence is often crucial to the prosecution of cases of sexual violence. Police Staff College Bangladesh apprehending the significance of training program regarding the aforesaid issue and arranged a workshop on “Medico Legal (Clinical) Test of Women and Child Victims of Sexual Abuse”, organized by “Bangladesh Legal Aid and Services Trust (BLAST)” and Supported by “Community Legal Services” on 16th March, 2017.
